**SEACOR MARINE INSTALLS XM WX SATELLITE WEATHER IN
OVER 100 VESSELS**

November 29, 2006, New Orleans, LA, -- XM WX Satellite Weather has announced today at the Workboat Show in New Orleans, LA., that SEACOR Marine has chosen XM WX as the on-board weather datalink service for its fleet of vessels. A continuous data stream from XM WX Satellite Weather gives SEACOR Marine captains the information they need to make confident decisions on the water. SEACOR Marine vessels will now be able to access localized weather information onboard like High Resolution Radar, Lightning, Buoy Data, Wave Direction and Height, and Wind Speed and Direction.

SEACOR Marine, a subsidiary of SEACOR Holdings Inc., operates one of the world's largest fleets of marine support vessels servicing the global offshore oil and gas exploration and production industry worldwide.

SEACOR Holdings Inc. through its subsidiaries is a global provider of marine support

and transportation services, primarily servicing the energy and chemical industries, including offshore services, U.S. coastwise shipping, inland river services, helicopter services, offshore and harbor towing services, and environmental services.

“XM WX provides our vessels with the most accurate and comprehensive suite of weather and sea-state information available,” Shull Autin, COO of SEACOR, said. “We will know exactly where the weather is, where it is going and what’s coming our way. Our entire US fleet is now equipped with XM WX and our Captains find it indispensable.”

“When you are out on the water, it is critical to know what the weather is going to be like both where you are and where you are going,” said Rod MacKenzie, XM Satellite Radio's Vice President of Advanced Applications and Services. “Now that SEACOR is fully equipped with XM WX, their Captains will have advanced situational awareness on the water.”

SEACOR will receive the data through XM’s S-band, dual-redundancy satellite system that provides service reliability throughout the continental United States and coastal waters, regardless of prevailing weather. As the weather products provided as part of the XM WX service are geo-referenced, optional GPS information can pinpoint a vessel’s location in relation to the weather information, allowing ship captains to navigate their ships to harbor with a clear understanding of any changing weather conditions.

About XM WX Satellite Weather

XM WX Satellite Weather is a comprehensive graphical weather data service offered by XM Satellite Radio, the nation's #1 satellite radio service. The weather data for the XM WX service is provided by WxWorx, Inc., an innovative weather company that provides site-specific, real-time weather information. Founded in 2002 as an affiliate of Baron Services, WxWorx employs the same weather data provided by Baron Services and used by meteorologists to reach more than 235 million people nationwide daily. XM WX sets the new standard for provision of much-needed weather information to aviation, mariner, and emergency responders. The combination of detailed and comprehensive weather data, continuous satellite delivery and exceptional coverage anywhere across the continental United States and coastal waters is simply unmatched.

The XM WX service is available in a choice of service tiers and is available on a wide range of hardware solutions to meet the needs of the specific market. For more information, visit www.XMWXweather.com.

About XM Satellite Radio

XM (NASDAQ: XMSR) is America's number one satellite radio company with more than seven million subscribers. Broadcasting live daily from studios in Washington, DC, New York City, Chicago, the Country Music Hall of Fame in Nashville, Toronto and Montreal, XM's 2006 lineup includes more than 170 digital channels of choice from coast to coast: commercial-free music, premier sports, news, talk radio, comedy, children's and entertainment programming; and the most advanced traffic and weather information. XM, the leader in satellite-delivered entertainment and data services for the automobile market through partnerships with General Motors, Honda, Hyundai, Nissan, Porsche, Subaru, Suzuki and Toyota, is available 140 different vehicle models for 2006. XM's industry-leading products are available at consumer electronics retailers nationwide. For more information about XM hardware, programming and partnerships, please visit <http://www.xmradio.com/>.

Factors that could cause actual results to differ materially from those in the forward-looking statements in this press release include demand for XM Satellite Radio's service, the Company's dependence on technology and third party vendors, its potential need for additional financing, as well as other risks described in XM Satellite Radio Holdings Inc.'s Form 10-K filed with the Securities and Exchange Commission on 3-9-06. Copies of the filing are available upon request from XM Radio's Investor Relations Department.
