**VEI SYSTEMS NOW OFFERING WXWORX ON WATER®
PRE-LOADED ON ITS MARITIME COMPUTER SYSTEMS**

Fort Lauderdale, Fla., November 3, 2005- WxWorx is pleased to announce that VEI will incorporate WxWorx on Water® software as a pre-installed option on any compatible VEI computer for easy access to the XM WX Satellite Weather service. This agreement provides consumers with a wider selection of compatible marine devices and makes VEI Systems an official OEM (Original Equipment Manufacturer) for WxWorx products.

VEI's PC systems are fully marinized for use onboard in wet outdoor environments or dry pilothouses, and are operable with a range of VEI and legacy displays. The company manufactures flat panel displays in sizes ranging from 8.4 to 23 inches.

With an XM WX receiver attached to the VEI computer, WxWorx on Water utilizes a continuous satellite broadcast from XM WX Satellite Weather to provide onboard, real-time weather data targeted to a boater's location. Invaluable parameters like high-resolution radar, wave conditions, sea surface temperatures and more are instantly available, along with an optional GPS input capability that lets boaters pinpoint their location on a moving map in relation to surrounding weather.

###

About VEI

Since 1988, VEI has been the leader in computer based electronic solutions for the marine industry. VEI provides computer and display solutions for all applications of software on any type of vessel. Our reputation and experience are why the US Navy, Army, Coast Guard and thousands of private yachts have made VEI their equipment of choice.

About WxWorx

WxWorx, Inc. is an innovative weather company that provides site-specific, real-time weather information for the XM WX Satellite Weather service. As the premier weather service for mobile users, it not only includes standard NEXRAD radar available from other resources, but a superior portfolio of data products that provide frequent updates on weather conditions. Weather data is retrieved and updated constantly from WxWorx sources located at thousands of points across the nation to ensure users have information at their fingertips whenever and wherever they need it. Founded as an affiliate of Baron Services in 2002, WxWorx employs the same weather data broadcast by meteorologists to more than 235 million people nationwide. The goal of the company is to prevent the loss of life by improving the delivery of highly specified weather information to mobile markets. In addition to its maritime offerings, WxWorx also provides solutions to the aviation and emergency response markets. WxWorx is based in Huntsville, Ala., with offices in Melbourne, Fla.
