

XM WX[®] SATELLITE WEATHER CHOSEN BY HONEYWELL FOR ITS GLOBAL AIRCRAFT WEATHER SOLUTION SUITE

OSHKOSH, WIS. — July 26, 2006 — XM Satellite Radio (**Nasdaq: XMSR**) announced today that Honeywell has chosen the XM WX[®] Satellite Weather graphical and text weather information service for its general aviation global weather solution suite.

The XM WX Satellite Weather will be available to aircraft operating in the United States with the Honeywell KDR 610 datalink weather receiver, which is designed to interface with the Bendix/King KMD 250, KMD 550 and KMD 850 Multi-Function Displays (MFD). It is expected to be available by the end of the year.

“We are very excited about Honeywell incorporating the XM WX service into their global weather data suite for use on Honeywell avionics,” said Roderick MacKenzie, XM Satellite Radio’s Vice President of Advanced Applications & Services. “The XM WX service delivers continuous, detailed weather information to the cockpit so pilots can make better-informed decisions under all weather conditions and at any altitude.”

The XM WX Satellite Weather service provides pilots with comprehensive, graphical information about weather conditions across the United States. The service delivers critical, real-time information for pilots including NEXRAD Radar in high resolution, full-color graphical format to review weather patterns overlaid on a map at a glance, METARs, AIRMETs, SIGMETs and TAFs.

Heads Up Technologies will produce the XM data receiver units for Honeywell. Heads Up Technologies previously worked with Honeywell's Cabin Management Systems & Services (CMSS) to integrate XM Satellite Radio’s audio entertainment, news, sports and talk programming.

About XM Satellite Radio

XM (Nasdaq: XMSR) is America's number one satellite radio service with more than 6.89 million subscribers. Broadcasting live daily from studios in Washington, DC, New York City, the Country Music Hall of Fame in Nashville, Toronto and Montreal, XM's 2006 lineup includes more than 170 digital channels of choice from coast to coast: the most commercial-free music channels, sports, talk, comedy, children's and entertainment programming; and the most advanced traffic and weather information.

XM, the leader in satellite-delivered entertainment and data services for the automobile market through partnerships with General Motors, Honda, Toyota, Hyundai, Nissan, and Porsche, is available in more than 140 different vehicle models for 2006. XM's industry-leading products are available at consumer electronics retailers nationwide. For more information about XM hardware, programming and partnerships, please visit <http://www.xmradio.com>.

About XM WX Satellite Weather

XM WX Satellite Weather is a comprehensive graphical weather data service offered by XM Satellite Radio, the nation's #1 satellite radio service. The weather data for the XM WX service is provided by WxWorx, Inc., an innovative weather company that provides site-specific, real-time weather information. Founded in 2002 as an affiliate of Baron Services, WxWorx employs the same weather data provided by Baron Services and used by meteorologists to reach more than 235 million people nationwide daily.

XM WX sets the new standard for provision of much-needed weather information to aviation, mariner, and emergency responders. The combination of detailed and comprehensive weather data, continuous satellite delivery and exceptional coverage anywhere across the continental United States and coastal waters is simply unmatched.

The XM WX service is available in a choice of service tiers and is available on a wide range of hardware solutions to meet the needs of the specific market. For more information, visit www.XMWXweather.com.
