

## Release Notes Version 1.31

We are pleased to announce the release of version 1.31 of WxWorx on Wings. The following enhancements or corrections have been completed in this version. It is recommended that you read the appropriate manual sections to get the complete details and functionality of these new features. The manual is installed automatically and is available through the WxWorx On Wings *Program group* in your *Start* menu

- ✓ Added the ability to control the number of frames in a Loop as well as the time between each Loop. Look under the **Setup** -> **Loop** to set these choices. Note: only two hours of data are stored on your computer, so any settings beyond this will not add any new data to the loop. PLEASE NOTE that the Loop process is processor intensive.
- ✓ Added the ability to change the range at which mapping features appear. Range can also be set so that feature does not appear (set range at 0,0). Look under **Setup** -> **Map Layers**
- ✓ Added the ability to change the range at which aviation mapping features appear. Range can be set as low as 5 miles but not turned off completely. Look under **Setup**->**Aviation Layers**.
- ✓ Un-decoded METAR data is available with a second click on the station graphic (after the decoded METAR data is visible).
- ✓ Changed the display of the GPS and status data.
- ✓ Added a permanent View Radius display beneath the map window.
- ✓ Added a *Flight Plan* button to access the flight plan window.
- ✓ Added a multi-state *Aimets/Sigmets* button to display this data at any time.
- ✓ All legends are now separate windows that can be viewed OR NOT according to user preference.
- ✓ Updated text on several buttons for clarity
- ✓ Added access to the manual from the **Help** menu
- ✓ Fixed bug with the GPS input from a GARMIN® 430/530 in panel GPS Navigation System.
- ✓ Fixed several bugs in the Flight Planning components of the software.
- ✓ New XmlLink version 1.28 to address some changes in data.
- ✓ Manual Version 1.31 to reflect the changes to this new upgrade.

More information on the additions and modifications are also available on the WxWorx website. The update can be downloaded from the web at:

<http://www.wxworx.com/downloads.html>

Or, if a CD is desired it can be purchased for the nominal fee of \$5.00 (plus shipping and handling) at: <http://www.wxworx.com/purchase.html#purchaseupgrades>

Thank you for your continued interest in WxWorx and its products. Please continue to look for more updates and announcements from WxWorx regarding our display or the XM WX Satellite Weather service. Your ideas and comments are always welcome we look forward to hearing from you.
